SITREP : #0007 - (0600HRS) Monday 10 January 2011

**Flooding inundation to habitable areas of homes:** NIL reported

**Where there are major incidents/events:** NIL reported

**WEATHER**

Monday - Rain, heavy at times. Local thunder. Moderate to fresh SE to NE winds  
At 0345HRS, BoM advised that heavy bands of rain are coming in from the East. Rain will be heavy at times. It is still expected that falls of greater than 100mm will fall across Brisbane, with 30-50mm expected to fall in the next couple of hours in locations.

Forecast:

Tuesday - Rain periods, possible thunder

Wednesday - A few showers

Thursday - A shower or two

**FLOOD INFORMATION CENTRE UPDATE**

**FLOODWISE Rainfall Summary**

Over the last 24 hours an average of 77mm of rainfall has occurred with the highest falls of 129mm occurring in Brisbane Forest Park and 118mm in The Gap. The lowest rainfall of 29mm occurred at Underwood.

In the last 6 hours an average of 13mm of rainfall has occurred with the highest 6 hour rainfall of 31mm occurring in Brighton and 27mm in Bracken Ridge.

Minor flooding is occurring at the following Location(s):-  
Enoggera Ck at Enoggera Dam with water levels Falling

Roads are flooded at the following Location(s):-  
Colleges Crossing Mt Crosby  
Mt Crosby Weir Mt Crosby  
BOSCOMBE RD Brookfield

FloodWise indicates flooding in Moggil Creek, Brookfield. RRG have been dispatched to investigate if there has been any impacts on the Community.

### **Brisbane River**

#### **High Tides**

Today's high tide, including the expected run off from the creeks, is expected to be 1.65m AHD (2.89m tide level). "High tide - Salt water over road" signs are still displayed in the known locations of king tide inundation. LAS will continue to monitor.

#### **Dam Release**

River levels upstream of the dam are rising quickly with significant inflow being generated from the intense heavy rainfall.

The dam will increase its releases starting this morning with the objective of keeping the combined flows in the lower Brisbane river to 4000m<sup>3</sup>/s which will cause a predicted level of 2.5m AHD (3.7m tide level) at the Brisbane City gauge by approximately Wednesday.

Based on the expected schedule of release the effects will result in inundation in low lying areas including habitable areas.

We have contacted SEQWater and have expressed concern about the proposal and consequences of a 4000m<sup>3</sup>/s flood through Brisbane. As a result SEQWater are reviewing their release strategy with their modeling expected to be completed by 0700HRS and will then be passed onto the BoM who will model the expected levels through the lower Brisbane reach.

These levels are dependant on the forecast rainfall over the next two days and will be re-assessed each day by the FIC, SEQWater and BoM.

FIC will continue to model the likely areas (streets and suburbs) impacted from these flows (4000m<sup>3</sup>/s) with results being available approximately 1400HRS today.

#### **BMTMC**

##### **Road's Closed**

Mt Crosby Weir between Allawah Rd and Stumers Rd Mt Crosby. (Motorist closest river crossing is now the Centenary Bridge at Jindalee)  
Paradise Road, Larapinta

Illaweena Street Drewvale  
Youngs Crossing Road, Joyner  
Wembley Rd, Berrinba  
Rafting Ground Rd at Rees Way, Greentrees Ave and Deerhurst Rd, Brookfield  
Widdop St Clayfield  
Melton St Nundah  
Gap Creek Road Brookfield  
Marshall Road Rocklea  
Formosa Rd between Stanborough and Dairy Swamp rd Gumdale  
Murphys Creek Road, Lockyer  
Manly Rd between New Cleveland Rd and Castlerea St, Manly  
Ropley Rd, Wynnum West  
Rosewood Warrill View Rd, Rosewood  
Molle Rd Ransome between New Cleveland and Chelsea Rd  
Haigslea-Amberley Rd 5 Mile Creek  
Ipswich Rosewood Rd 7 Mile Creek

Warrego Highway between Toowoomba and Dalby is closed until further notice.

The Gatton-Clifton Road is closed to all traffic between Doyles Camp Bridge and MCGinleys Road. There is a 5 tonne load limit between McGinleys Road and the New England Hwy.  
(updated 3.30pm 5.1.11)
