Releases are currently within river bank

Releases have no reached the designated minor flood levels as determined by the BOM and local councils.

At this stage still very much a minor event. No impact on localised flooding at this stage.

Cheers Mike

Subject: Seqwater update as requested

John/Dan

Seqwater operates in accordance with the gazetted flood operations manual

Manual designed to ensure the structural safety of the dam and the mitigate downstream impacts

The process includes advising councils of any impending impacts on their infrastructure (bridges, roads). Current releases have resulted in the closure of bridges in Ipswich and Somerset Regional Council areas including Town Bridges, Savages Crossing and Colleges Crossing.

Wivenhoe

Currently releasing 23,500 ML/day from Wivenhoe.

Releases have not reached the designated minor flood levels as determined by the BOM and local councils. Current releases are within river banks

At this stage still very much a minor event. Any impact on localised flooding, if at all, would be minor.

If further larger releases are required other bridges may be impacted and these include Burtons Bridge, Kholo Bridge and Mt Crosby Weir and Fernvale Bridge in a planned sequence. At this stage it is very unlikely based on current inflows and projected forecasts that Mt Crosby and Fernvale Bridge will be impacted.

North Pine

Four gates currently operating and releasing approx 52,000ML/day. In March this year were releasing almost 40,000 ML/day.

Moreton Regional has been advised and has closed Young's Crossing

All impacted Council have been contacted and advised of current releases by Seqwater prior to releases occurring.

Cheers Mike

The releases were not a surprise.

The trigger levels and release procedures are the same as they were when SEQ Water was owned by Councils, and similar to those used to manage inflows in 1999.

Seqwater has been in regular contact with Council officers regarding the releases plans, including a teleconference with Brisbane City Council's emergency team on Sunday. No objections were raised.

We are updating the HIB to include these points.

HOT ISSUE BRIEFING NOTE

| | |
|----------------------|---|
| HOT ISSUE G.X | Wivenhoe Dam and regional flooding |
| Question | Is the release from Wivenhoe Dam set to cause regional flooding? |

Issue:

- As reported in the Courier Mail – ***Brisbane suburbs due to flood tomorrow after Wivenhoe Bungle.** Parts of Brisbane are set to flood tomorrow regardless of whether it rains or not, because the controlled water released from Wivenhoe Dam will combine with a peak tide.*
- This hot issue brief responds to the question - Is the release of water from Wivenhoe Dam set to cause regional flooding?

Answer:

- Releases from Wivenhoe and Somerset Dam are being made in accordance with the approved flood release manual. This flood management plan is signed off by the Dam Safety Regulator and gazette.
- Wivenhoe and Somerset Dam have provided significant flood mitigation for this event reducing the peak flow in Brisbane by between fifty to sixty percent.
- Current releases from Wivenhoe are approximately one-third of what would naturally come down the river without the dam in place to store flood water.
- As part of managing inflows over the past week Seqwater has held back 500,000-600,000 mega litres (equivalent of a Sydney harbor) which is now being discharged through controlled release.
- The current release was held back until the flood flows from the Bremer and Lockyer had subsided sufficiently.
- The threshold for damaging floods in the Brisbane area is 3500 cubic metres per second and our current releases are well below (1200 cubic metres per second).

- Seqwater does not believe the current releases will have any significant impact in levels in the lower Brisbane River in the coming days.
- In discussions with BOM they agreed the discharges from Wivenhoe will have an insignificant impact on flood levels on lower Brisbane River compared to the high tide impact.

Ian and John

I believe the Director-General, Department of the Premier and Cabinet, has recently written to you regarding the new Queensland Government advertising code of conduct, which the Premier tabled in Parliament on 2 September 2010.

I reiterate the Premier's and now Minister Robertson's direction for both your respective agencies to ensure there are effective management processes in place for approvals of any marketing campaign material.

The updated Code requires that advertising campaigns be planned, developed, implemented, funded and evaluated taking into account the following:

1. There must be a direct and obvious benefit to the people of Queensland.
2. Advertising must be directed at, and focused on, the sections of the community to which it is relevant. It must have an educative or informative role dealing with something that is new or about which the community is unaware or unclear.
3. The clear benefit from any Government advertising must be in its informative or educative role so that there can be no perception of any party-political benefit.
4. Advertising must be presented in objective language and be free of political argument.
5. Advertising must not try to foster a positive impression of a particular political party or promote party-political interests.
6. Advertising must not:
 - (a) mention the party in Government by name;
 - (b) directly attack or scorn the views, policies or action of others such as the policies and opinions of the other political groups;
 - (c) include party political slogans or images;
 - (d) be designed to influence public support for a political party, a candidate for election or a Member of Parliament; or
 - (e) refer or link to the websites of politicians or political parties.
7. There should be no advertising within six months of the scheduled date for an election unless there is an urgent emerging issue.
8. Money designated for service delivery in a State Budget must not be diverted to the cost of advertising.

The Code applies to print advertising (eg. newspapers, magazines and inserts), electronic advertising (eg. television, radio and internet), outdoor media (eg. billboards, bus/taxi advertisements) and all other types of media services covered under the Queensland Government Master Media Advertising Placement Services Standing Offer Arrangement. Additionally, brochures, newsletters, direct mail outs and other like forms of communication must conform to the above conditions set down for advertising.

Again, please ensure your department should ensure that there are effective management processes in place for approvals of any marketing campaign material, including financial delegations and creative concepts.

Regards, Lance.

Brisbane Local Disaster Management Group is meeting this morning and has undertaken to update EMQ on the situation. As soon as we get that we'll pass it on

BCC has been undertaking hydrology scenario planning overnight and today to try and predict what might happen.

The BOM has not issued any flood warnings for the situation as of yet.
