No problem. Col is wrong on the discretion stuff in my view. I will sort it out tomorrow.

Subject: Colin aplet's report

John

I was talking to the boss this morning and apart from Colin's endorsement as presented he would like to get the same sort of endorsement for the recommendations and a clear statement that the one instance of discretion Colin reported on was within the purview of the manual, ie. Not requiring a process for approval at dam safety regulator etc AND it was the correct decision at the time and helped mitigate the flooding.

The same request would be for all the expert reviewers really. Not sure if they will go there but that is the request

Could you please advise if you think this will cause any issues
