CCM-3	Detailed breakdown of the Master Program for the repair and reinstatement work in relation to roads, drainage and bridges as at 19 August 2011.
CCM-4	Forecast cost schedule for the repair and reinstatement of flood damaged Council open space and built environment
CCM-5	Ipswich Flood Disaster Recovery - Open Space and Built Environment Master Schedule dated 24 August 2011
CCM-6	Detailed breakdown of the Master Program for the Open Space and Built Environment repair and reinstatement work
CCM-7	A schedule detailing the location of 97 detention basins throughout the Ipswich City Council area
CCM-8	Map identifying the location of 10 catchment studies
CCM-9	Report summarising the current status of each catchment study
CCM-10	Two maps identifying the location of 17 sub-catchment studies
CCM-11	Report summarising the current status of each sub-catchment study

WITNESS STATEMENT OF CARL CHRISTIAN WULFF

This written statement is provided in response to a Requirement, dated 10 August 2011, to provide a written statement, under oath or affirmation, to the Queensland Floods Commission of Inquiry pursuant to section 5(1)(d) of the *Commissions of Inquiry Act 1950* (Qld).

I, Carl Christian Wulff, Chief Executive Officer of the Ipswich City Council (variously described throughout this statement as "ICC" or "Council"), 45 Roderiek Street, Ipswich in the State of Queensland, state on oath as follows:

Introduction and Qualifications

- 1. Ipswich is Queensland's oldest provincial City, located approximately 40 kilometres southwest of the Brisbane CBD and adjoining the Brisbane, Lockyer and Fassifern Valleys.

 Ipswich has a range of smaller townships within the western and rural areas of the City. The Bremer River and its tributaries flow through much of the City and surrounding region. The junction of the Brisbane and Bremer Rivers falls within the City boundary, at Riverview/Karalee to the north-east of the City.
- 2. The City has a population of approximately 175,000 and covers an area of 1,090 square kilometres. The Ipswich region is administered locally by the Ipswich City Council. The Council operates within the local government framework established by the Queensland Government through the *Local Government Act 2009* (Qld) and comprises a Mayor and 10 Divisional Councillors. The Council manages a net asset base in excess of \$2 billion.
- 3. On 4 July 2006 I commenced in the role as Chief Executive Officer of the Council.
- 4. As Chief Executive Officer I have various responsibilities under the Local Government Act 2009 (Qld)¹, including oversight of the Council's operations, and the Chief Operating Officers of the Council's 6 functional Departments² report to me. I in turn report to and am accountable to the Council. Council has delegated powers to me (and I have in turn delegated powers to

Legal\304960184.2

Section 13(3) of the Local Government Act 2009 (Old)

² The current Council Departments are Infrastructure Services, Works, Parks & Recreation, Community & Cultural Services, Planning & Development, Finance & Corporate Services and Health, Security & Regulatory Services.

The Executive Secretariat, including the Office of Economic Development, Office of the Mayor and Internal Audit Branch are accountable to and report through me.

- other Council officers) to make decisions on various matters within the scope of those delegations.
- 5. I have management responsibility for approximately 1300 employees and an annual budget of around \$500 million.
- 6. I am also a Director of a number of Council related entities: Ipswich City Enterprises, Ipswich City Enterprises Investments and Ipswich City Properties.
- 7. I hold the following qualifications:
 - Diploma of Engineering (Civil) NSW Institute of Technology;
 - Bachelor of Engineering (Civil) NSW Institute of Technology; and
 - Master of Business Administration University of Wollongong.
- 8. I am also a member of a number of professional bodies and associations including the following:
 - Fellow of the Institute of Municipal Management.
 - Fellow of the Institute of Engineers Australia;
 - Fellow of the Institute of Public Works Engineering Australia;
 - Graduate of the Australian Institute of Company Directors; and
 - Member of the CEO Institute of Australia.
- 9. I have approximately 35 years experience, primarily in the public sector, initially as an Engineer, and, over the past 20 years, in public administration. Prior to my appointment as CEO of Ipswich City Council in 2006 my previous employment included:
 - 1976-1980: Senior Engineer, Fairfield City Council, NSW;
 - 1980-1981: Contracts Manager, Ackroyd Pty Ltd, NSW;
 - 1981-1983: Director, BRW Constructions Pty Ltd, NSW;
 - 1983-1985: District Engineer, Eurobodalla Shire Council, NSW;
 - 1985-1989: Division Engineer Wollongong City Council, NSW;

- 1989-1992: Manager Environmental Engineering, Wollongong City Council, NSW;
- 1992-1993: Manager Works, Wollongong City Council, NSW;
- 1993-2000: Deputy Chief Executive Officer, Wollongong City Council, NSW;
- 2000-2004: Group Manager City Services, City of Greater Dandenong, Victoria;
 and
- 2004-2006: Chief Executive Officer, City of Greater Dandenong, Victoria.

Commission of Inquiry Requirement Notices dated 10 August 2011

- 10. The Commission of Inquiry has issued 3 Requirements dated 10 August 2011 to myself and to the Ipswich City Council Head of Planning & Development, Mr John Adams, to provide written statements. There is:
 - (a) some overlap in the content of the Requirements issued to myself and Mr Adams;
 - (b) some matters raised in the Requirement directed to me (for example information regarding changes to Council's land planning processes in response to the flood event) which are better addressed by Mr Adams; and
 - (c) some matters raised in the Requirements directed to Mr Adams (for example details of Council infrastructure affected by flooding) which are better addressed by me.
- 11. Where there is overlap in the Requirements, to avoid duplication, the most appropriate person as between myself and Mr Adams will respond to the Requirement. Also, in the interests of efficiency and avoiding duplication I will, where appropriate, cross-reference my statement to the statement of Mr Adams. I will also, where appropriate, cross-reference my statement to earlier submissions made by Ipswich City Council to the Commission of Inquiry without repeating the detailed information contained in those earlier submissions.
- 12. A key area which I will address in this statement is the impact of the 2011 flood event on ICC's infrastructure. However, before addressing that matter, I will comment briefly on two matters being:
 - (a) my role during the January 2011 event; and
 - (b) the status of Council's response to the recommendations contained in the Commission of Inquiry's Report issued on 1 August 2011.

My role during the January 2011 flood event

- 13. I was present in Ipswich throughout the duration of the January 2011 flood event. The Ipswich LDMG under the leadership of Mr Tony Trace as Local Disaster Coordinator was responsible for disaster management. I attended all LDMG meetings so that I was abreast of developments.
- 14. The immediate post event recovery was overseen by a local recovery task force lead by the Chief Operating Officer of the Health, Parks and Recreation Department

 Throughout the recovery operation I was kept updated by Mr
- 15. The situation was very dynamic and I allowed the LDMG, the recovery task force and other Council officers to get on and perform their roles. My time was primarily spent in the field assessing first hand the impact of the event across the City and overseeing the logistical response. I kept in close contact with my Council team and intervened where it was appropriate to do so. I was also the primary interface between the executive and management teams and the Mayor and Councillors.

Queensland Floods Commission of Inquiry - Interim Report - ICC Response to Recommendations

- 16. Following the release of the Commission of Inquiry's Interim Report and flood preparedness recommendations on 1 August 2011, I instructed the Ipswich City Solicitor to identify the recommendations relevant to Council and to the City, and to convert these recommendations into an operational document so that Council can monitor progress against implementation of the recommendations before the next wet season.
- 17. Council has identified that 72 of the 175 recommendations contained in the Interim Report are of immediate relevance to Council:
 - (a) Chapter 2 Dams -2 recommendations;
 - (b) Chapter 3 Disaster Framework, preparation and planning 5 recommendations;
 - (c) Chapter 4 Forecast, warnings and information 18 recommendations;
 - (d) Chapter 5 Emergency Response 46 recommendations; and
 - (e) Chapter 6 Emergency Services 1 recommendation.
- 18. These relevant recommendations have been reproduced in an operational matrix or spreadsheet which identifies, for each recommendation, the relevant ICC action, the ICC Department Head with responsibility for the action, the current status, the date of the last status update and the

Legal\304960184.2

date of completion (or implementation) of the recommendation. Attached to my statement and marked CCW-1 is a copy of the operational spreadsheet.

- These recommendations are being implemented in conjunction with the work being undertaken the by the Ipswich City Local Flood Recovery Group (LFRG) and related recovery subgroups, and the implementation of the ICC Community Recovery Plan. The role of and work being undertaken by the Ipswich City LFRG is detailed in the supplementary Ipswich Local Recovery Group and Disaster Preparedness Actions Plans submission provided to the Commission of Inquiry on 6 June 2011.
- 20. The ICC Department Heads responsible for implementing the respective actions detailed in the operational spreadsheet are also responsible for updating the status of the actions relevant to their areas of interest on a regular (fortnightly) basis.
- The updated spreadsheets will be tabled fortnightly at a meeting of the executive and monthly through the LFRG (which includes Councillors as part of its composition). This will ensure that the implementation of the Commission's recommendations is appropriately monitored, progressed and resourced.
- I expect that the significant majority of these recommendations will have either been implemented or substantially progressed by the time of commencement of the 2011/12 wet season. Some of the recommendations, either because of cost considerations, or because the implementation involves a whole of Government or multi-local government response may not be fully implemented by that time.
- 23. In around late October/early November 2011 I will provide the Commission with an update on the status of the implementation by Council of the Interim Report recommendations.
- 24. Recommendation 4.13 of the Commission of Inquiry's Interim Report provides that:

"Councils should ensure that residents and businesses can clearly understand the impact of predicted flood levels on their property..."

- 25. Recommendation 4.13 goes on to identify a number of methods by which this may be achieved.
- 26. ICC is currently considering implementing recommendation 4.13 through having a free of charge on-line flood mapping service publicly available on the Council's website. The objective of the service will be to provide information which will assist property owners, residents and business in understanding the impact of predicted flood levels on their property and in making informed decisions in the case of a future flood event. This service is a work in

progress that is currently under development. I expect to be in a position to provide the Commission with a supplementary statement setting out details of this service prior to the Commission's sittings in Ipswich on 18/19 October 2011.

Commission Requirement Notices - Flood Impact on Council Infrastructure

- 27. I turn now to address the issues raised by the Commission Requirement Notices. The Requirement directed to me dated 10 August 2011 asks that I provide a written statement as to a number of matters relating to Council infrastructure including:
 - (a) the extent to which Council's infrastructure (for example sewers, roads and stormwater) was affected by flooding during the period 1 December 2010-31 January 2011 [Requirement 4];
 - (b) details of the reconstruction of this infrastructure including costs and programs [Requirement 5]; and
 - (c) funding arrangements for repairs to damaged Council infrastructure [Requirement 6].
- 28. The Commission Requirements directed to Mr Adams include similar requests, being details of Council infrastructure (sewers, roads, stormwater etc) that was affected by flooding during the period 1 December 2010 to 31 January 2011 [first Adams notice, Requirement 8 and second Adams notice Requirement 1].
- 29. I will address these Council infrastructure issues in this next section of my statement.

Flood Impact on ICC Infrastructure - Overview

- 30. The 2011 flood event was the most costly natural disaster in the City's history.
- 31. The floods caused approximately \$120 million damage to City infrastructure comprising:
 - (a) repair and reinstatement costs \$113 million (approx);
 - (b) counter-disaster costs \$4 million (approx);
 - (c) emergent costs \$3 million (approx).
- 32. Counter-disaster costs are the direct costs incurred during and immediately following the flood event, for example running evacuation centres, closing and re-opening roads, cleaning up following the event, removing debris and the such like.

- Emergent costs relate to the work undertaken in the month or two following the event to effect temporary repairs, make safe, and to return assets (for example roads and parks) to a functional state, albeit on a temporary basis, pending final repair and reinstatement.
- 34. The repair and reinstatement costs of \$113 million fall into two streams:
 - (a) roads, bridges and drains: approximately \$68 million; and
 - (b) open space and built environment: approximately \$45 million.
- These costs do not include the losses sustained to businesses and individual properties throughout the Ipswich region.
- The Council is committed to carrying out all flood related repair and reinstatement work at the earliest opportunity and intends to lodge progressive submissions and claims with the Queensland Reconstruction Authority applying for NDRRA (Natural Disaster Relief and Recovery Arrangements) funding for the costs of repair and reinstatement of all damaged assets, counter-disaster costs and emergent works costs. Some such claims have already been lodged. It is the responsibility of the Queensland Reconstruction Authority to assess claims for eligibility and to administer funding on behalf of the NDRRA.
- The Council's reconstruction program is to some extent predicated on how quickly claims to the Queensland Reconstruction Authority are processed and paid, and delays in that process have at least the potential to slow down the program of works.
- 38. However, Council also recognises that some reinstatement works may not be eligible for NDRRA funding and has included a contingency fund in its 2011/12 capital works program to fund any works that are not eligible for NDRRA funding. Should that contingency fund be insufficient it may become necessary for Council to re-prioritise the "business as usual" capital works program to ensure that all reinstatement works are completed, as Council is committed to carrying out all flood related repair and reinstatement works in a timely fashion.
- 39. On 22 February 2011 the Council provided a preliminary NDRRA submission as at 15 February 2011 to the State Department of Local Government and Planning. A copy of the 15 February 2011 NDRRA submission was attached as Schedule 8 to the ICC's 23 March 2011 submission to the Commission of Inquiry (refer also to paragraph 4.8 of the ICC submission). An initial high level overview of the impact of the flood event within the ICC area including the impact on ICC infrastructure, is set out at paragraph 4.7 of that submission.
- 40. The 15 February 2011 NDRRA submission was not a formal submission for funding, but rather an initial assessment of the extent and type of damage sustained to ICC infrastructure,

and an indicative assessment of the likely repair costs. That initial assessment has been refined as the extent of damage and cost of rectification has been become clearer, with some repair costs increasing, some costs decreasing, and for some of the damaged infrastructure, the scope of works has changed.

- 41. In February 2011 ICC received an advance of \$20.7 million from the NDRRA against the flood damage repair costs. However, to date, ICC has self-funded much of the cost and to the end of August 2011 has spent \$30.1 million and committed an additional \$14.3 million on flood related repairs and reinstatement with a resultant funding gap of \$9.4 million against money spent and a gap of \$23.7 million against money spent/committed.
- 42. The ICC 2011/12 budget documents, issued in June 2011, refer to Council having borrowed an additional \$28 million specifically to fund the carrying out of flood repair work. Council has not raised a flood levy and has covered the cost of this financing within the general rate.
- In his 2011/12 budget speech delivered on 27 June 2011, the Ipswich City Mayor, Councillor Pisasale announced an average increase in the differential rate for category 1 residential owner occupiers for 2011/2012 of 3.52% (71 cents per week) of which flood recovery work accounted for a little over half (1.88% or 38 cents per week) of the increase.
- 44. The Mayor said that the additional 38 cents per week allowed Council to meet the costs associated with the borrowing of \$28 million specifically for flood repair work.
- 45. Council anticipates that a considerable amount of the flood related repair and reinstatement work to Council infrastructure will have been carried out by the end of 2011 and that most of the work will have been completed by mid-2012. The largest repair cost relates to the Colleges Crossing Recreation Reserve, with a cost of approximately \$12.5 million. It is expected that the last item of repair work to be completed will be the Colleges Crossing Recreation Reserve. This work is estimated to be completed by the end of 2012.
- 46. In the next section of my statement, I will address in more detail the extent of Council infrastructure affected by the flooding and provide details of the reconstruction of this infrastructure, including costs and programs.
- 47. The repair and reinstatement of all Council assets is being oversighted by a project control group. The project control group is serviced by Coffey Projects as a consultant. The Council officers on the project control group comprise myself, the Chief Financial Officer, the Chief Operating Officer for Works, Parks & Recreation and the Chief Operating Officer for Infrastructure Services.

Repairs and reinstatement of Roads, Bridges and Drains

48. The Council submission of 23 March 2011 (paragraph 4.7(d)) noted that approximately 760 roads and 20 bridges within the ICC area sustained some level of damage in the flood event.

With the work that has been undertaken since March 2011, those figures can now be updated:

(a) gravel roads: 220

(b) Inundated roads: 201

(c) non-inundated roads: 499 (total roads - in excess of 1,000)

(d) bridges: 19

(e) drainage assets: 202

- Attached to my statement and marked CCW-2 is a colour copy of the Ipswich Flood Disaster Recovery Master Schedule (version no. 14 dated 27 July 2011) for the Roads, Drainage and Bridges procurement package. AECOM is providing project management support to ICC in relation to the roads, drainage and bridges repairs and reinstatement work. As noted earlier in my statement the total cost of this work, including project management costs, is approximately \$68 million and the current projected completion dates are:
 - (a) inundated roads December 2011;
 - (b) non-inundated roads September 2012;
 - (c) drainage June 2012; and
 - (d) bridges September 2012.
- 50. The Master Schedule identifies the works being divided into four procurement packages for roads, drainage, bridges and project management and technical support respectively.
- 51. The Master Schedule also identifies, as at the date of the Schedule, the work packages that are:
 - (a) at the pre-tender stage (highlighted in red);
 - (b) currently out to tender or tenders closed (highlighted in blue);
 - (c) currently under construction (highlighted in orange); and
 - (d) works completed (highlighted in green).

- 52. For example, repair work in relation to gravel roads has been undertaken at 140 sites and has been completed at a cost of \$880,000. Asphalt pavement restoration, which is a major component of the repair work, is currently under construction. As at the date of the schedule, tenders for major drainage work and bridge restoration work had not closed, although the tender for major drainage restoration work has since closed.
- This Master Schedule provides the status of these works packages as at the date of the schedule. It also includes details of the cost of the works that have been completed or are under construction, and the projected costs for the works that are still at the tender stage. If it is of assistance to the Commission I will update the position as to progress with these works at the time of the Ipswich sittings on 18/19 October 2011.
- I have also annexed to my statement and marked CCW-3 a detailed breakdown of the repair and reinstatement work in relation to roads, drainage and bridges, showing in gantt chart format as at 19 August 2011 the location and status of each element of the works, identifying actual work completed and remaining work to be completed, the budgeted cost (where known) and the expected duration of the works. For those works that are still at the pre-tender or tender stage (for example major drainage and bridges) a zero cost is shown. This will then be upgraded as tenders are accepted and construction contracts are let.

Repairs and Reinstatement of Open Space and Built Environment

- Annexed to my statement and marked CCW-4 is a schedule detailing the forecast total cost (exclusive of project management expenses) for the repair and reinstatement of flood damaged Council open space and built environment. These costs total \$39.6 million (approximately \$45 million inclusive of project management) comprising:
 - (a) flood affected buildings and major open space infrastructure \$36.5 million;
 - (b) flood affected parks restoration work \$1.6 million;
 - (c) flood affected mechanical and electrical components \$1.3 million; and
 - (d) streetscape \$200,000.
- The repairs and reinstatement works comprise 2 stages. Immediately following the flood event in January 2011 emergent works had to be undertaken to make safe, clean up and where possible, have facilities operational or partly operational. These works were internally project managed by ICC and the cost of these works is largely included in items such as electrical and streetscape, and some initial works undertaken at facilities such as the Riverview Depot, the

Ipswich Pound, and at leisure facilities such as the Bundamba Swimming Centre, the Goodna Pool and various other sporting complexes.

- 57. In the second stage the more substantive repair and reinstatement works will be undertaken.

 Many of these works have been bundled into packages for tendering and project management purposes.
- 58. Annexed to my statement and marked CCW-5 is a colour copy of the Ipswich Flood Disaster Recovery Open Space and Built Environment Master Schedule (version no. 18 dated 24 August 2011).
- 59. Council is being assisted in the project management of the repair and reinstatement of the open space and built environment assets by Coffey Projects. However, some elements of the work are being internally project managed by Council. On the Master Schedule (Exhibit CCW-5), the works being managed by Coffey Projects as Project Superintendent are those identified to the left hand side of the schedule, with a white background. The projects being 100% project managed by Council are those to the right hand side of the schedule, with a grey background.
- The open space and built environment works program has been developed by the ICC Infrastructure Services team, in conjunction with Coffey Projects. The Infrastructure Services team meets weekly to overview and update the works program as required, and reports to the Project Management Office which comprises representatives of Coffey and the ICC Head of Infrastructure Delivery
- As with the roads, drainage and bridges master schedule, the open space and built environment master schedules identify, as at the date of the schedule, the works packages that are:
 - (a) in the pre-tender or design stage (highlighted in red and purple);
 - (b) currently out to tender (highlighted in blue);
 - (c) currently under construction (highlighted in orange); and
 - (d) project delivery completed (highlighted in green).
- Many of the works packages have been and will be let to contractors pursuant to the Council's usual procurement procedures. However, some of the works are also being delivered under the Council's Community Jobs Program (CJP). For example the Pan Pacific Peace Gardens, a large Council park comprising board walks, pathways and gardens, and a number of the smaller parks are being repaired and reinstated by CJP teams. In these instances the repair cost is limited to the cost of materials.

- Many of the open space facilities are parks and sporting facilities located in low lying areas.

 These facilities sustained very substantial damage in the flood event. In many cases support facilities such as kiosks, wet areas, change rooms, offices, sheds and the such like were destroyed and need to be demolished and replaced. However, because of the nature of the facility it has been possible through carrying out some initial emergent works to have the facility at least partly operational pending the completion of the more extensive reconstruction work.
- 64. It has been important to Council, as part of the community recovery, to have facilities such as swimming centres, tennis courts, netball courts, football fields, parks, BBQ facilities, playgrounds and the such like reinstated as soon as possible, even if in some cases this has been only on a partly operational basis.
- 65. However, in the case of the Ipswich Knights Sports Club, Goodna Bowling Club, Kippen Park Sports Club and the Goodna Cultural & Arts Centre (other than a gymnasium area) the facilities were destroyed and require a complete rebuild, and are not currently operational.
- Annexed to my statement and marked CCW-6 is a breakdown of the Master Program for the Open Space and Built Environment repair and reinstatement work in gantt chart format as at 25 August 2011 detailing the various works packages and other Council managed works, the current projected commencement and completion dates, and the expected duration for the works.
- On the basis of current works schedules most of the work is expected to be completed by mid 2012, with the reinstatement and rebuilding of the Colleges Crossing Recreational Reserve, by far the largest individual project, presently scheduled for a December 2012 completion date.
- 68. If it is of assistance to the Commission I will be able to update the position as to progress with these works at the time of the Ipswich sittings on 18/19 October 2011.

Commission Requirement Notices - Flood Mitigation Infrastructure and Capacity Issues

- The first Requirement notice directed to Mr Adams dated 10 August 2011 requires that Mr Adams provide a written statement as to a description of the measures used by Council to protect Council infrastructure (sewers, roads, stormwater etc) and to ensure such infrastructure functions during a defined flood event [Requirement 9].
- 70. The second Requirement notice directed to Mr Adams dated 10 August 2011 requires that Mr Adams provide a written statement as to:

- (a) details of any flood mitigation infrastructure (for example flood detention basins, stormwater culverts, backflow devices) in the Council's area including a description of the maintenance programs for such infrastructure [Requirement 2]; and
- (b) details of the stormwater design capacity and urban run-off capacity, sewerage design capacity and the most recent review of these capacities including details of any plans to upgrade [Requirement 3].

Although addressed to Mr Adams, these are essentially engineering rather than planning related enquiries and are best addressed by me. I do so in the following paragraphs of my statement.

A description of measures to protect Council infrastructure during a defined flood event [Mr Adams Requirement 9]

- 71. The Commission has asked that ICC comment on measures used by Council to protect Council infrastructure (sewers, roads, stormwater etc) and to ensure that such infrastructure functions during a flood event.
- 72. Sewers are now within the jurisdiction of Queensland Urban Utilities, and I exclude the protection of sewers from my comments.
- 73. In relation to Council infrastructure more generally, the issue of specific steps taken to protect infrastructure in the lead up to the January 2011 flood event has previously been addressed:
 - (a) at paragraphs 9.46-9.54 of Council's submission to the Commission dated 23 March 2011; and
 - (b) by Mr Tony Trace at paragraphs 79-81 of his statement to the Commission dated 6 April 2011.

I do not repeat those matters in this statement.

- 74. Council has in place proactive and regular inspection and maintenance programs for all Council infrastructure. Regular condition assessments of Council assets are conducted through the Works, Parks and Recreation Department and a proactive maintenance program is conducted through the City Maintenance division under the direction of the City Maintenance Manager.
- 75. City maintenance extends to maintenance activities in relation to roads, drainage and built infrastructure, parks, sports and vegetation, natural areas and urban forest.

- 76. Routine inspections and condition assessments are undertaken of infrastructure such as bridges, road pavement and drainage and where issues are identified, this can lead to maintenance activity, or, in some cases, remedial projects being included in rehabilitation budgets.
- 77. As discussed later in this statement in response to [Mr Adams Requirement 2] some assets, for example the smaller detention basins, are not subject to a regular maintenance program other than regular mowing where appropriate. However these assets, like all Council infrastructure, are subject to a regular inspection regime and remedial work can and does arise out of such inspections.
- 78. In terms of more systemic measures to protect Council infrastructure during a defined flood event, it must be noted that a significant amount of Council's assets are historic in nature and are located within the defined flood zone. A large number of these assets are roads and footpaths and have been built some 30 40 years ago, or even longer in some cases. The most appropriate way to protect these assets is to ensure that stormwater systems are clear and clean. As I have noted, this is achieved through a regular maintenance program.
- 79. In the event of smaller rainfall events, the effect on these assets is minimised. However, in major events such as the January 2011 event, when these assets become totally inundated, Council's ability to protect the assets is limited by the fact that their age and style of construction make them vulnerable to the effects of inundation.
- 80. Cognisant of these factors, Council's approach to the restoration of these assets is to reconstruct them from materials which will enhance the resilience of the assets to withstand the effects of inundation in future events. For example, road pavements are being reconstructed out of full depth asphalt pavement rather than a granular base, which is subject to deterioration from inundation.
- 81. In the same way, Council's approach to constructing or reconstructing future assets located within an inundation zone will be to construct these from more resilient road materials which will better withstand the impact of future inundation.
- 82. There are, however, some assets which because of their location and the nature of their use will remain within the flood zone. These include parks and some sporting facilities, and buildings constructed within those parks and facilities. In the reconstruction and future construction of these types of buildings, and related facilities, the objective will be to maximise the use of materials which will be resilient to inundation so that the facilities can be

Legal\304960184.2

brought back into use as quickly as possible and at as low a cost as possible following a major event.

- 83. Council has demonstrated in the past an understanding of this concept in that two of the key buildings at Colleges Crossing (being the caretaker's residence and the kiosk) were designed and built in a way that they could be quickly dismantled and removed from the site, as occurred in advance of the January 2011 event. Council's approach to other buildings in parks wherever feasible and possible is to build them in the manner and style which may allow their relocation during a flood event.
- 84. In essence, the key intentions and objectives of Council in relation to protecting Council infrastructure during a defined flood event will be:
 - (a) to build infrastructure that is relocatable;
 - (b) to build infrastructure from materials which are resilient to inundation and can be brought back into service quickly; and
 - (c) where the option exists, to build infrastructure so that it is located outside of or above the flood zone.
- As to this last option, any new Council buildings have, since 2004, been subject to the requirements of the 2004 and 2006 Ipswich Planning Schemes respectively and, since April 2011, the provisions of the Temporary Local Planning Instrument 01/2011 Flooding Regulation.
- 86. The Ipswich City Planning Scheme also includes a level of requirements in areas such as engineering and building standards that must be adhered to. These standards apply to Council infrastructure.
- 87. Council is also actively involved in interaction with State and Federal authorities as to the impact that State and Federally funded and managed projects may have on Council infrastructure. That interaction is generally cooperative.
- 88. By way of illustration, in relation to the current Ipswich Motorway upgrade, a combined Federal and State government initiative, works were proposed to be carried out to a certain level as part of the planned design. However, in collaboration with Council officers, the design was enhanced to include provision of a pipe system from the motorway to the Brisbane River to assist in local up-stream flood mitigation. As beneficiary of the enhanced flood mitigation solution, Council was prepared to commit some funding to the cost of the enhanced solution.

- 89. Council is engaged in regular representation to and collaboration with State and Federal authorities with respect to infrastructure being developed as part of a State or Federal initiative so as to minimise the impact of that initiative on Council's infrastructure, and, wherever possible, to achieve an enhanced outcome for Council infrastructure.
- 90. I have discussed in paragraph 78 and following some systemic measures in relation to infrastructure protection during a defined flood event. Finally, in terms of this subject, there are examples of specific measures that have previously been taken by Council in relation to specific infrastructure. I have previously referred to the design of the kiosk and residential infrastructure at Colleges Crossing that enabled that infrastructure to be quickly deconstructed and relocated in advance of the flood event.
- 91. Another example concerns the collapsible fences at the Riverheart Parklands which can be dropped during a flood event to better protect the fence and to prevent rubbish and debris being caught up in the fence.

Details of flood mitigation infrastructure and maintenance programs [Mr Adams Requirement 2] Detention Basins

- 92. There are currently 2 major detention basins within the Council area, located at Rosewood and Marburg. These detention basins perform a major flood mitigation role at their respective locations. Each is managed in accordance with the relevant operating manual, and is subject to a strict and regular maintenance and inspection regime and regular audit.
- 93. As each basin has also been assessed as a referable dam (Rosewood category 1 and Marburg category 2) they are also subject to the requirements of the *Water Act 2000* (Qld).
- 94. The Rosewood detention basin, located at Matthew Street, Rosewood near the Karrabin-Rosewood Road is intended to reduce the potential for flooding in the Rosewood town centre. An embankment approximately 10m high catches run-off from the steep local catchment of 1.4 km² below Perrys Knob. The basin is proportioned to pass the 100 year Average Recurrence Interval (ARI) flood without the spillway discharging.
- The spillway consists of a rockfilled, concrete covered, gabion and mattress channel and cascade built over the embankment. The spillway crest is constructed about 200mm higher than the level to which the basin storage would rise during a 100 year ARI flood event, and 1.8m below the dam crest level. As designed, the dam crest flood was the probable maximum flood.
- 96. The Marburg detention basin on Black Snake Creek above the outskirts of the Marburg township is intended to reduce the potential for flooding properties in the Marburg town

centre. An embankment approximately 10m high intercepts run-off from the creek catchment of about 17 km² to the south. The basin is proportioned to pass the 100 year ARI flood without the spillway discharging.

- 97. The spillway consists of a rockfilled, concrete covered gabion and mattress channel and cascade built over the embankment. Its crest is nominally 2.5m below the embankment crest. The dam crest flood, which rises above the spillway crest to just reach but not overtop the embankment crest, is the 50,000 year ARI event.
- 98. Having regard to the summer 2010/2011 weather forecasts, in the period from around October 2010 ICC was engaged in close monitoring of the Rosewood and Marburg detention basins to ensure that there were no obstructions in the pipework. During the January 2011 flood event neither detention basin discharged its spillway. If the Commission requires additional information in relation to the Rosewood or Marburg detention basins, this can be provided.
- 99. In addition to these 2 major detention basins there are 97 other detention basins throughout the Council area which function as local flood mitigation devices within minor sub-catchments.

 Annexed to my statement and marked CCW-7 is a schedule detailing the location of these detention basins.
- These detention basins are an asset which only come into operation during an event. They are generally in the nature of depressions in public land which serve to retain, manage and control the run-off and overland flow of water through an area in a flood event. They are managed through a routine inspection regime. Maintenance work emanates from the inspection program as these are assets that do not typically require a specific maintenance regime, other than some fencing and mowing.
- There are also a further 71 minor basins across the Ipswich area which serve a predominantly water quality role as bio-retention areas, rather than a flood mitigation role.

Levees

There are currently no levees within the ICC local government area. Following on from the January 2011 flood event Council has commissioned a high level study by Parsons Brinckerhoff to examine the feasibility of constructing levees to better protect critical locations across the City, including the Ipswich CBD. An initial report is expected by the end of this year. The purpose of the Parsons Brinkerhoff study is to assist Council in developing a clear direction on the potential of levees. Either they have no value as a flood protection strategy for the Ipswich area or they are worthy of further investigation in general or for specific locations.

If the PB report indicates a potential benefit in the construction of levees, it is likely that a more detailed investigation will be commissioned.

Stormwater culverts/stormwater run-off systems

- My comments in relation to stormwater culverts and run-off are also relevant to the topic addressed below regarding details of stormwater design and urban run-off capacity.
- Within the developed urban areas there are generally few if any stormwater culverts. Rather, these areas, depending on their age, are developed with an underground drainage system. I discuss these systems further below. Stormwater culverts tend to exist in more rural settings, for example areas of relatively flat land such as Rosewood, Grandchester and Walloon, and are used to convey water emanating in creeks and gullies from one side of the road to the other via a culvert under the roadway.
- The adjacent road can be designed as a causeway or floodway, so that if the culvert is unable to meet capacity in a major event, excess water is discharged across the road rather than backing up and causing an upstream backwater effect.
- 106. Most stormwater systems are designed to a 1:5 year or 1:10 year flood event capacity. It is very unusual to design a stormwater system to a 1:100 year capacity as it is simply not economically feasible to do so.
- Stormwater is typically catered for throughout the Ipswich urban area by underground drainage systems. In some cases the stormwater pipes have been in the ground for many decades. These drainage systems have a known capacity and are subject to a regular cleaning and maintenance program. In addition, where particular circumstances require, as was the case with the weather forecasts in the lead up to the 2010/2011 wet season, ICC's drainage maintenance crews had a particular focus on the maintenance of the stormwater systems and gross pollutant traps to ensure that these were clear of debris and obstructions, and functioning effectively.
- The capacity of the stormwater system is "static" unless some action is taken to change the capacity. I address in more detail in paragraphs 114-126 below studies currently being undertaken by ICC in this regard.
- As urban development occurs, the issues of stormwater capacity and urban run-off are addressed on an ongoing basis as part of the development approval process, so as to ensure capacity is at least maintained and, where feasible to do so, is enhanced.

- In terms of more modern design, underground drainage systems are complemented by kerb and channel design which enables the road system itself to operate as an overland flow path in extreme weather events. Under modern design, as applied across the City of Ipswich, excess water in a major flood event which cannot be accommodated by the stormwater system is dispersed through use of the road system as an overland flow path.
- However, Ipswich is an old city and some of the road systems were designed and laid out without regard to modern run-off and overland flow path practices, with the result that in some of the City's older areas excess stormwater in a major event flows through private property.
- These stormwater system design shortcomings cannot be effectively "retrofitted" and the solution in Ipswich has been for the Council to acquire properties where it is feasible to do so and create an overland flow path. Whether or not to do so involves a cost-benefit assessment of the particular circumstances.

Review of stormwater design and urban run-off capacities [Mr Adams Requirement 3]

- In relation to the issue of sewerage design capacity, this is now the responsibility of Queensland Urban Utilities and I am not in a position to address enquiries as to the sewerage design capacity or any recent review of those capacities.
- In relation to stormwater design capacity and urban run-off capacity, as I have already noted, the system capacity is static and does not change unless some step is taken to effect that change. The issue of capacity, and potential changes to capacity, are typically addressed through a drainage or flood study. Such studies can be used to identify:
 - (a) the existing system capacity;
 - (b) the required system capacity;
 - (c) the "gap" between current and required capacity;
 - (d) the options to address the capacity gap; and
 - (e) the costs to address the capacity gap.
- 115. ICC, through its Works, Parks & Recreation Department has and continues to invest a significant amount of funds in undertaking drainage and flood studies across the City. There are currently 27 such studies at various stages of progress. Most of these studies had commenced prior to the 2011 flood event as part of Council's ongoing program, and not in response to that event.

- In some cases Council has obtained NDRRA funding for the study, but in many instances the studies are funded by Council. The studies are being undertaken by a range of professional consultants.
- 117. The current drainage and flood studies can be broken down into two categories:
 - (a) Catchment studies; and
 - (b) Sub-catchment studies.
- The results of these studies will provide Council with a range of measures that may be adopted or undertaken to assist with future stormwater and run-off design and flood mitigation. The potential mitigation measures generally fall into 2 categories:
 - (a) "hard" measures, which involve enhancement to existing infrastructure; and
 - (b) "soft" measures, which can be reflected in planning outcomes.
- 119. Catchment studies span an entire creek system and/or suburb or locality. There are 10 catchment studies currently being undertaken. They are at various stages of progress. These are studies in relation to:
 - Walloon
 - Thagoona
 - Rosewood
 - Marburg
 - Bundamba Creek
 - Deebing Creek
 - Six Mile Creek
 - Goodna Creek
 - Woogaroo Creek
 - Sandy Creek.
- 120. Recommendations arising from the catchment studies may require substantial amounts of capital investment to implement, and may take some years to be included in future capital

works programs. Flood models arising from these studies will be used to inform development control lines for the purposes of the Ipswich Planning Scheme and for development assessment purposes.

- 121. Annexure CCW-8 to my statement is a coloured map identifying the location of the 10 catchment studies.
- 122. Annexure CCW-9 to my statement is a report briefly summarising the current status of each catchment study.
- Sub-catchment studies are smaller studies conducted over an area forming part of a larger catchment, usually a gully or overland flow path. The study areas typically represent historical drainage problem areas. There are 17 sub-catchment studies currently being undertaken. Once again these studies are at various stages of progress. The studies are in relation to:

Central Suburbs

- Edwards Street, Ipswich/Raceview
- Booval
- Kendall Street, Newtown/East Ipswieh
- City East (Newtown, Ipswich Central, Woodend)
- Bourke Street, Brassall
- Rowan Drive, Brassall
- Pioneer Drive, Raceview
- Raceview East
- Jones Street, Blackstone
- Kerners Road, Yamanto
- Tristania Street, Yamanto

Eastern Suburbs

- Cashmere Drive, Redbank Plains
- Wilkie Avenue, Redbank Plains

- Duncan Street, Redbank Plains
- Highbury Drive, Redbank Plains
- Albert Street, Goodna
- Church Street, Goodna.
- Recommendations arising from the sub-catchment studies may be relatively inexpensive to implement (involving the taking of easements and pipe and related infrastructure costs) and able to be included in short term capital works programs.
- 125. Annexure CCW-10 to my statement is 2 coloured maps identifying the location of the 17 sub-catchment studies, 11 being conducted in the Central Suburbs and 6 in the Eastern Suburbs.
- 126. Annexure CCW-11 to my statement is a report briefly summarising the current status of each sub-catchment study.
- 127. All catchment studies and some sub-catchment studies are assisted by a study advisory group (SAG) who provide technical input and local knowledge into the development and outcomes of the study. The SAG is a requirement of NDRRA funded studies, and ICC has extended this concept into the more complex non-NDRRA funded studies. The SAG typically comprises Council officers, the Chairperson of the City Works Committee, Divisional Councillors (representing the community) and representatives of external organisations such as DERM, EMQ and SES.
- In addition to these 27 catchment and sub-catchment related studies, the Council has four other flood and drainage mitigation related studies in progress. Three of these ((a) (c) below) are not flood or drainage studies, but studies for the purpose of informing Council policy and policy development. The four studies relate to:
 - (a) Citywide policy development, that is, integrating all of the catchment studies, and overlaying this with the development of a related investment strategy and policy direction;
 - (b) flood risk management briefing paper;
 - (c) flood damage curves; and
 - (d) Springfield flood impact assessment.

Commission Requirement notices - planning issues

- The Requirement directed to me dated 10 August 2011 requires that I provide a statement as to:
 - (a) the details of any draft flood studies obtained or made available to the Council since March 2011 [Requirement 1];
 - (b) any changes to the Council's draft planning processes, policies or other statutory instruments in response to the flood event [Requirement 2];
 - (c) how information about flood risk for specific properties is made available and any processes for obtaining this information applicable to members of the public, insurance companies and potential developers and their representatives [Requirement 3]; and
 - (d) any policies or other documents which require property owners to have an evacuation plan and/or route in the case of flooding [Requirement 7].

Draft flood studies obtained or made available to Council since March 2011 [Requirement 1]

- 130. Council has received the following 13 draft or interim reports since March 2011 in relation to the drainage and flood studies I have described in paragraphs 119-128 above:
 - (a) Springfield Impact Statement July 2011;
 - (b) Rosewood Draft Catchment Study July 2011;
 - (c) Walloon July 2011;
 - (d) Six Mile Creek August 2011;
 - (e) Goodna Creek August 2011;
 - (f) Rowani Drive August 2011;
 - (g) Tristana Street August 2011;
 - (h) Kerners Road July 2011;
 - (i) Edward Street July 2011;
 - (j) Wilkie Avenue June 2011;

- (k) Duncan Street May 2011;
- (1) Highberry Drive July 2011; and
- (m) Thagoona May 2011.

How information about flood risk for specific properties is made available [Requirement 3]

- With regard to Requirement 3, I have mentioned in paragraph 26 that Council has under consideration and development a proposed new on-line flood mapping system designed to assist residents and businesses in understanding the impact of predicted flood levels on their property.
- Aside from this prospective on-line search capability, information about flood risk for specific properties was available to members of the public, insurance companies, prospective developers and their representatives at the time of the January 2011 flood event, and continues to be available today. Council provides information on flood risk through the following publicly available searches.
- 133. Firstly, a property inquiry can be made through PD Online on the Council webpage. An address or real property description can be used to identify the property the subject of the search for which information is required. The property inquiry provides information on zoning under the Planning Scheme, whether or not any applications have been recorded for that property, and development constraints, including whether or not the property is affected by the flood lines on map OV5 in the Planning Scheme. The information can be printed and viewed on a map. This is a free search that was available to be undertaken in January 2011.
- 134. This search continues to be available, and has been upgraded to also include the flood regulation line from the Temporary Local Planning Instrument 1/2011 Flood Regulation.
- Another search that can be undertaken at no cost on PD Online is a map identifying the 1 in 20 development line and the 1 in 100 flood line. This information is accessed by undertaking a map search on the Council website. This search was available in January 2011 and continues to be available. This information has also now been updated to include mapped flood regulation lines under the Temporary Local Planning Instrument.
- 136. A search of urban stormwater flow path areas is also available free of charge to the public through PD Online. This search was available in January 2011.
- 137. Information is also available to the public by ordering a Council flood search and paying the requisite fee. These flood searches have been available to the public since at least 2004. The

Legal\304960184.2 24

search application form is online on the Council website on the Property and Rates search page. This flood search can be combined with other types of search including planning and development property searches.

- In terms of the flood search, there are two searches that can be undertaken. The first is a development control line flood search, which provides information on whether the property concerned is affected by the 1:20 development line or the 1:100 flood line. The search includes a map.
- The second search is a 1974 flood search which provides information as to whether the property was affected by the 1974 flood and includes details of the 1974 flood levels if available. This is a flood levels search not a flood lines search, and does not include a map.
- In terms of future searching for information about flood risk, in addition to the free online service to go live shortly, Council is progressing work to produce a consolidated single map which identifies each of the 1974 flood line, 2011 flood line, 1:20 development line (where applicable) and 1:100 flood line. I expect this "4 maps in 1" search to be available to the public by the end of this year. It will be able to be ordered online or over the counter and available to members of the public upon the payment of a search fee.

Commission Requirements 2 (changes to the Council's draft planning processes) and 7 (policies or other documents regarding evacuation plans)

- Requirements 2 and 7 are largely planning related matters and are better addressed by the Council's head of the department of Planning and Development, Mr Adams.
- Mr Adams has addressed these matters in Topics 14 and 8 respectively of his statement to the Commission. I have read what Mr Adams has set out in his statement as to these matters and agree with his comments.

SWORN this 2. day of September 2011 at Ipswich in the State of Queensland in the presence of:

Carr emistran wumi (Deponem) (Solicitor)

4.	Wherever possible, Emergency Management Queensland should consult with local disaster management groups before sending emergency alerts to residents. Emergency Management Queensland should inform the local disaster management group, as soon as it can, about any message already sent to residents in that local disaster management group's area.				
4.6	Individuals and businesses should be encouraged to acquire battery operated radios for use in emergencies.				

(

No	Recommendation	ICC Action	ICC Responsibility - Dept Head	Status	Date of Status	Date Completed
4.7	Councils should ensure that residents are aware of the frequency of the radio station or stations in their local area that will disseminate flood warnings and other information during disasters.					
4.8	Councils that have not already done so should consider how social media may be used effectively to provide accurate information about flood					
	levels and local conditions to residents during a flood event.					
				• •		

	No:	Recommendation	ICC Action	ICC Responsibility - Dept Head	S tatus	Date of Status	Date Completed
		A siren may be appropriate in smaller towns or rural communities susceptible to flash flooding. If councils rely on sirens to warn residents, they should ensure that the community understands the meaning of the siren.					
(:							
		Councils, with the assistance of the Bureau of Meteorology, should examine the feasibility of and priorities for installing additional river height and rainfall gauges in areas of identified need.					
(.							
	4,11	Councils, with the assistance of the Bureau of Meteorology, should					
		consider the susceptibility of their regions to flash flooding, and whether it is feasible and necessary to acquire and operate an automated local evaluation in real time system (ALFRT system) for particular waterways.					

No.	Recommendation	(CC Action	ICC Responsibility Dept Head	Status	Date of Status	Date Completed
	Councils should ensure that residents and businesses can clearly understand the impact of predicted flood levels on their property. This may include one or more of the following methods: • information on rates notices about flooding at individual properties • geospatial mapping, available to the public, that depicts inundation at certain river heights • flood markers • flood flag maps and floodwise property reports • colour coded maps • information that relates gauge heights with the level of flooding to be expected at a property.		CFO			
	In the course of flood events, warnings referring to gauge heights should include information about the location of the gauge.					
	Each local disaster management group should include in its meetings a representative of the operator of any dam upstream of its region which contributes water to flooding.					
4.24	The operator of any referable dam and the local disaster management group should develop a common understanding as to their respective roles in a flood event and the type and frequency of information the dam operator will provide to it and local residents.					
			-			
	Councils should continue to take responsibility for issuing flash flooding warnings. However, where the Bureau of Meteorology becomes aware of weather conditions likely to cause flash flooding that is likely to endanger life or property in a particular council's region, it should, performing its functions in the public interest, directly communicate that information to the relevant council					
	Councils should advise the Bureau of Meteorology of any information they possess about flash flooding (or the immediate prospect of it) likely to endanger life or property in their region, and of any warnings they issue about such flash flooding. The Bureau of Meteorology should consider in each case whether any such warning should be re-published (whether as a warning emanating from the Bureau itself or as attributed to the relevant council) on the Bureau's website, or whether it should provide a link to any council warning or other information regarding flash flooding provided by councils or disaster management agencies.		·			
	The Bureau of Meteorology should do its best to develop working relationships with all councils, particularly for the purpose of exchanging information in severe weather and flood events.					
A service of the service of the service of the State of t	gency Response					
	When a local government cannot effectively manage its response to a disaster, disaster management personnel from local governments in a position to assist should be deployed to help the local disaster					
5.2	Local governments should consider adopting uniform disaster management software, to enable inter-council assistance to be given more easily and effectively.					

No.	Recommendation	ICC Act	lon	ICC Responsibility =	Status	- Date of Status	Date Completed
in the second				Dept Head :			
5.3	To ensure effective co-ordination in larger-scale disasters, deployment of personnel (and other resources) between local governments should be facilitated through the Council to Council (C2C) program.						
5.6	As part of their planning before the next wet season, local disaster management groups should identify communities which, because of distance, the potential for isolation by disaster, or any other reason, may require specific disaster management arrangements, and take steps to establish them. Such arrangements may include forming disaster management sub-groups in those communities						
5.7	Whatever form arrangements take, they should seek to ensure that, in the event that flooding causes isolation: • there are lines of communication between the local disaster management group and the community • the community has the basic resources it needs to cope with its situation • the local disaster management group is aware of what supplies the community may need in prolonged disaster, and can respond to requests for assistance in a timely way						
5.8	Where a local government forms a sub-group of its disaster management group: • the responsibilities of the sub-group must be clearly defined within the local disaster management arrangements • each member of the sub-group must clearly understand his or her role.						
	The Commission recommends that sub-groups and local disaster management groups set out their respective roles and responsibilities in writing.		1				
5.9	Until the All Hazards Information Management System is in place and allows the status of requests for assistance to be tracked, other means should be used to keep local disaster management groups informed of the progress of requests for assistance.						
5.1	A clear protocol should be developed for managing the participation of local and district disaster management groups in the state level teleconferences, to govern and make more efficient participation in the teleconferences.						
5.32	Before the next wet season, councils, SES controllers and Emergency Management Queensland should work together to identify and address deficiencies in the ability of the SES to respond effectively to flooding. At the very least, suitable flood boats and flood boat training should be						
5.4	Each council should develop an evacuation sub-plan in accordance with the Emergency Management Queensland guidelines. This includes involving local groups and people in the planning process.						

	No.	Recommendation	ICC Action	ICC Responsibility - Dept Head	Status	Date of Status	Date Completed
	5.41	Councils with existing evacuation sub-plans should review them to ensure they address the issues identified from the 2010/2011 floods.					
:							
(
		Where flooding is governed by a particular watercourse, the evacuation sub-plan should identify triggers in the form of those water level heights at which it is known that preparation for evacuation will be necessary.					

	No.	Recommendation	ICC Action	C Responsibility - Dept Head	Status	Date of Status	Date Completed
		It is a matter for councils whether or not they choose to publicise the location of evacuation centres before a disaster but there is a good deal to be said for doing so, particularly in smaller communities where the options are limited. Whether or not councils publicise the location of evacuation centres before a disaster, they should include in their disaster education programs information on evacuation procedures, and how to ascertain evacuation centre locations and safe evacuation routes.					
(;							
		During floods, councils should as quickly as possible provide people in the relevant areas with advice as to the location of and routes to evacuation centres.					

.

		Local disaster management groups and district disaster management groups of which the Australian Red Cross is not currently a member should include the Australian Red Cross in disaster preparation and planning as well as response, whether as a member or otherwise (see Local and district disaster management groups should notify the					
		Local and district disaster management groups should notify the Australian Red Cross of their evacuation needs as soon as possible in a disaster.					
		Disaster response agencies should use the National Registration Inquiry System.					
(/		During a disaster, councils and the Queensland Police Service should encourage individuals to self-register with the National Registration Inquiry System.					

No.	Recommendation	ICC Action	ICE Responsibility - Dept Head	Status	Date of Status	Date Completed
5.61	Councils should include information about the National Registration Inquiry System as part of their community education.					
 5.62	In areas susceptible to flooding, councils should identify facilities housing people who may require assistance to evacuate. Councils should work with the operators of these facilities to ensure they have appropriate evacuation plans and that they are aware of the council's disaster management arrangements.					

Ñō.	Recommendation	ICC Action	ICC Responsibility - Dept Head	Status	Date of Status	Date Completed
5.6	Councils should identify the specific evacuation needs of these facilities, such as increased timeframes for withdrawal or transport by ambulance.					
5.64	Councils should include the location, contact details, and specific evacuation needs of these facilities in their evacuation sub-plans.				;	
:						
			•			

No.	Recommendation !	ICE Action	ICC Responsibility - Dept Head	Status	Date of Status	Date Completed
5.65	Councils should identify organisations (for example, Meals on Wheels and Bluecare) that provide services to people in the community who may be unable to evacuate without assistance. Councils should include the contact details of these organisations in their evacuation sub-plans.					
	·					
	Councils should work with these service providers to identify: the number of people who may require assisted evacuation; the general nature of their needs, including any necessary medical supplies and equipment; warning message formats and dissemination; increased timeframes needed for evacuation; transportation requirements; and shelter requirements. Councils should include this information in their evacuation sub-plans.				· · · · · · · · · · · · · · · · · ·	

	No.	Recommendation	ICC Action	ICC Responsibility - Dept Head	Status	Date of Status Date Co	ompleted
		Facilities housing people who may be unable to evacuate without assistance should develop evacuation plans to ensure residents are provided with appropriate transportation, emergency accommodation, trained carers and medical support if necessary. Where possible, residents of those facilities should be relocated to other similar facilities or accommodation other than evacuation centres. These plans should be developed in consultation with councils and relevant agencies such as Queensland Health.					
(;							
		Facilities housing people who may be unable to evacuate without assistance should prepare disaster recovery plans, particularly for the provision of back up power and emergency supplies, including medical					
()		oxygen and common medications, to minimise the need for evacuation where there is no direct threat from natural disaster.					

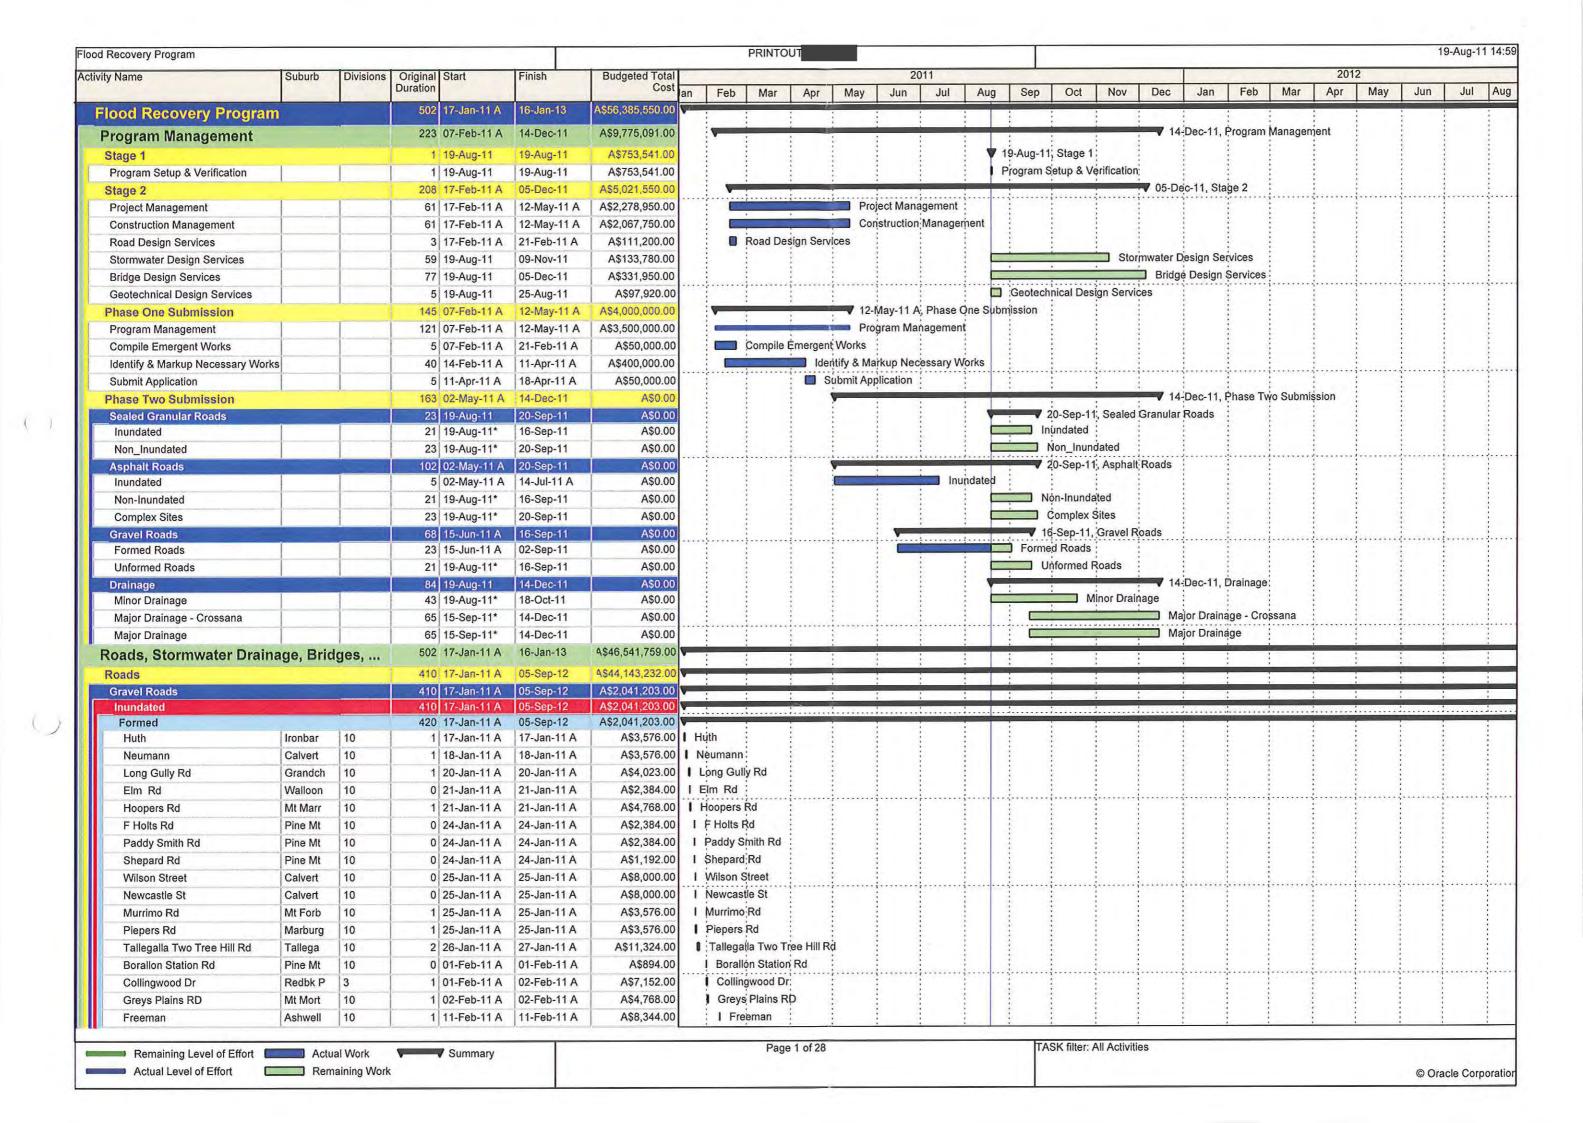

No	Recommendation	«ICC Action	ICC Responsibility - Dept Head	Status	Date of Status	Date Completed
5.69	The Queensland Government and councils should ensure information about emergency preparedness, warnings and evacuation is available in the different languages of ethnic groups in the community and in Auslan.					
5.7	As part of their community education strategy, councils should ensure tourists are made aware of evacuation procedures, how to ascertain evacuation centre locations and safe evacuation routes. That may be					
-	done through tourism boards, operators and accommodation providers.					

-(

No.	Recommendation	ICC Action	ICC Responsibility - Dept Head	Status:	Date of Status	Date Completed
prep	uncils, as part of their community education program for disaster eparation, should encourage pet owners to consider what they will do h their pets if they need to evacuate.					
	•					
tran	uncils should work with the RSPCA to develop plans about nsporting and sheltering pets should they need to be evacuated with ir owners.					
		·

Highbury Drive, Redbank Plains	 » Sub-catchment within the Goodna Creek catchment » Study well advance (70%) with flood model established » Draft report received form consultant. 	✓
Albert Street, Goodna	 Study well advance (70%) with flood model established Extensive work undertaken with respect to options to improve local drainage through Lower James Street and used for negotiations with IMU (DTMR/Origin). Mitigation options upstream of IMU under investigation. 	✓
Church Street, Goodna	 » Study well advance (60%) with flood model established » Mitigation options under investigation. 	✓

No.	Recommendation	ICC Action	ICC Responsibility- Dept Head	Status	Date of Status	Date Completed
2.1	Seqwater should act immediately to establish: 1. a steering committee to oversee the long term review of the Wivenhoe manual including senior representatives of at least DERM, Seqwater, the Water Commission, the Water Grid Manager, Brisbane City Council, Ipswich City Council and Somerset Regional Council 2. a technical review committee comprised of Independent experts in at least hydrology, meteorology and dam operations to examine all technical work completed as part of the review.	NB: PD will need to be involved in any suggested land use planning and flood plain management outcomes.	CEO	CEO is a member of the Steering Committee. First meeting was held on 25 August 2011 with further meetings held on 15 September and 13 October 2011. Next meeting is scheduled for 10 November 2011.	18.10.11	
2.14	The Commission recommends that a review be conducted of the number and distribution of ALERT gauges within the Wivenhoe and Somerset catchments. This review should include an assessment of the usefulness and cost effectiveness of installing more gauges, particularly at high elevations in the catchment. Such an assessment would appropriately involve the Bureau of Meteorology, DERM and Seqwater, and the relevant local councils.	Prior to the January 2011 event, ipswich commenced a review of the Alert Guage network within the Ipswich Local government area. This review, in conjunction with BOM and SEQwater, identified the following activities; 1. Rectification of Identified ICC ALERT Flood Warning Monitoring System Gaps 2. maintenance and Upgrading of existing sites. The project also includes a provision for raising of community awareness of flood issues in the locality and in Ipswich generally, and for building of local volunteer capacity. In addition to this, ICC participated in an initial consultative workshop-with BOM, SEQwater, EMQ, QPS and other-local governments to discuss a "whole of catchment" approach to the Lockyer, Brisbane and Bremer Catchments. This approach includes; - Knowledge & Information Management sharing (ie: Models, studies etc) - Management of Alert guage network - Communication protocols:		Not applicable to ICC as not in the catchments referred to	12.10.11	Completed
Chanton 2 Diagram	ter frameworks, preparation and planning					
	Every local government susceptible to flooding should ensure that, before the next wet season, its local disaster management plan: • is consistent with the Disaster Management Act 2003 • addresses local risks and circumstances • can be used easily in the event of a disaster	Plan is currently being reviewed with sign off by November. Additional update now required to be consistent with EMQ recently released templates but may not meet a November deadline	COO WP&R	Submission for approval by end November 2011	12.10.11	
	Every person who is required to work under a local disaster management plan should be familiar with the plan before next wet season	In conjunction with EMQ, a Training competency framework has been developed. [see attachment 1]	COO WP&R	LDC training as first stage completed 31.08.11	12.10.11	
3.6		Plan to be published once review is complete and Ipswich City Council and the LDMG have approved.	COO WP&R	Support from Marketing and EBSB. December 2011 aimed for approval. Update from EBSB: EBSB are poised to assist with publishing the document once it is available	09.09.11 10.10.11	
	conduct community education programs which provide local information about (at least) the following topics: • the measures households should take to prepare for flooding • the roles and functions of the SES and details of how to contact and join it • whom to contact if assistance is needed during a flood • contact details for emergency services in the area • the types of warnings that are used in the area, what they mean and what to do in the event of a warning	Development of a "Community Awareness Framework" [attachment 2] has commenced targeting schools, impacted communities, high risk sections of the community as well as a pre-season program. This development is being done in conjunction with LDMG members. The roll out of this program forms part of the activities of Council's Community Development Officers". Finalisation of this Framework will be undertaken by Council's Emergency Management Officer. [TT]	COO C&CS	Support from Marketing and LDC/EMO. Commence post recruitment of EMO	09.09.11	

						T
3.14	To ensure consistency, the Queensland Government should assist local governments to develop and deliver the community education programs.	Stage 1 - Current Project Brief to Develop Major Historic Flooding information, ground levels and eave height levels available to public online for free. Stage 2 - Will involve geospatial mapping to depict impacts at certain levels. PD should also be involved. Development of a "Community Awareness Framework" has commenced to target schools, impacted communities, high risk sections of the community as well as a pre-season program. This development is being done in conjunction with LDMG members.[TT]	coo c&cs	Mapping Project & Annette Schoone - ensure consistency in delivery of education programs. Marketing Branch has prepared a communications plan for flood mapping. A web-based flood map search facility has been created. Estimated date to set live is 30 September 2011 (pending Council approval) Marketing Branch has prepared an insert for the October 17 rates release which provides details of Council's online flood map search functionality. Marketing Branch commenced weekly insert into Info Page Notice (print media) commencing first week in October on Being Prepared and the link to Council's website for further Emergency Mgmt Information. This notice will continue until late Feb 2012.	27.09.11 06.10.11	
Chapter 4 Fore	casts, warnings and information		PROFESSION OF STREET			
4.1	In issuing warnings for a district or region, local and state authorities should use a range of different warning mechanisms effective for the particular district or region, including methods which do not rely on electricity.	As part of the review of the Communications and Warning sub-plan of the LDMP, identification of alternate warning systems and investigation into capabilities against event scenarios will be undertaken.[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT]	coo c&cs	Marketing Branch is investigating SMS Broadcast and Alert Systems (digital exchange national enquiry system) to progress Support from LDMG/Tony Trace Meeting has taken place with EBSB Meeting has taken place with EBSB Grand Message Manager system. Awaiting advice from regarding capabilities. Discussion held with Who is also looking at LGAQ options. 06.10.11 Briefing by two SMS providers in October. Recommendation to be made on options to implement.	28.09.11 06.10.11	
4.2	Councils should prepare SMS alert templates covering a range of different flood scenarios before the wet season.	As part of the review of the Communications and Warning sub-plan of the LDMP, the guidelines for usage of the SEWS need to be incorporated, including the development of individual catchment templates[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT]	coo c&cs	Marketing Branch has set meeting with Tony Trace (13 Sept 2011) to ascertain what is already available to progress. Follow up with Disaster Management Officer (DMO) and gathering template documents. Draft required by 5 Oct 11. SMS templates written Update from EBSB: Options paper provided regarding potential delivery mechanisms.	09.09.11 09.21.11 28.09.11 10.10.11	Completed 10.10.2011
4.3	SMS alerts should direct recipients to websites or contact numbers providing more detailed information about flood locations and predictions, the location of evacuation centres and evacuation routes.	As part of the review of the Communications and Warning sub-plan of the LDMP, the guidelines for usage of the SEWS needs to be incorporated, including inclusion action statements.[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT]	coo c&cs	Marketing Branch to discuss with Tony Trace and Management web page has been created to progress Support from Tony Trace *Marketing Branch has made substantial updates to the Emergency Management page of www.ipswich.qid.gov.au and relocated this page under the Residents tab on the home page. A tile has also been placed on the home page which links directly to the Emergency Management page. SMS templates written based on EMQ templates	10.10.11	Completed 10.10.11
	ensure the approval process does not cause delays in delivering SMS alerts.	MOU with EMQ to provide agreed sign off process. As part of the review of the Communications and Warning sub-plan of the LDMP, the guidelines for usage of the SEWS need to be incorporated, including approval mechanisms and processes.[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT]	COO WP&R	MOU in draft form with second draft being reviewed	02.09.11 10.10 11	

						· · · · · · · · · · · · · · · · · · ·
4.6	Individuals and businesses should be encouraged to acquire battery operated radios for use in emergencies.	Development of a "Community Awareness Framework" has commenced targeting schools, impacted communities, high risk sections of the community as well as a pre-season program. This development is being done in conjunction with LDMG members. The roll out of this program forms part of the activities of Council's Community Development Officers". Finalisation of this Framework will be undertaken by Council's Emergency Management Officer. [TT]	COO C&CS	*Commence post recruitment of EMO to review Emergency Management area of www.ipswich.qld.gov.au. Emergency Management area updated on Council website. Fridge Magnet for community education has been drafted. Once finalised will be distributed to each household in addition to distributing at events, community centre, libraries, divisional offices etc. Fact Sheets for distribution to community currently being compiled. Will be distributed to most vulnerable areas with document wallet. Fridge magnet completed. Will be distributed to every household across the lipswich Region by mid November.	09.09.11 14.09.11 21.09.11 28.09.11	
4.7	Councils should ensure that residents are aware of the frequency of the radio station or stations in their local area that will disseminate flood warnings and other information during disasters.	Development of a "Community Awareness Framework" has commenced targeting schools, impacted communities, high risk sections of the community as well as a pre-season program. This development is being done in conjunction with LDMG members. The roll out of this program forms part of the activities of Council's Community Development Officers". Finalisation of this Framework will be undertaken by Council's Emergency Management Officer. [TT]	COO C&CS	*Commence post recruitment of EMO *Marketing Branch will ensure that this information is available in the appropriate area of www.ipswich.qld.gov.au Emergency Management & Community Recovery area updated on ICC website under "Residents". ICC is participating in a state-wide web portal www.hardenup.org regarding emergency management. Harden Up aims to be a scalable platform for online engagement during severe weather with community, government, media, business and research. www.hardenup.org will be live across Queensland mid-	06.10.11	
4.8	Councils that have not already done so should consider how social media may be used effectively to provide accurate information about flood levels and local conditions to residents during a flood event.	Report has been prepared - EMT directed required.	coo c&cs	to progress. and in consultation with to review when social media use would be most effective and how this will be	09.09.11 14.09.11 28.09.11	Completed. Available and ready for use 06.10.11
4.9	A siren may be appropriate in smaller towns or rural communities susceptible to flash flooding. If councils rely on sirens to warn residents, they should ensure that the community understands the meaning of the siren.	As part of the review of the Communications and Warning sub-plan of the LDMP, identification of alternate warning systems and investigation into capabilities against event scenarios will be undertaken.[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT]	COO WP&R	Currently reviewing applicability as concerns re conflicts and confusion with local emergency sirens (volunteer and Sate)	12.10.11	
4.10	gauges in areas of identified need.	Additional gauges have been identified and will be installed prior to the wet season. Prior to the January 2011 event, Ipswich commenced a review of the Alert Gauge network within the Ipswich Local government area. This review, in conjunction with BOM and SEQwater, identified the following activities; 1. Rectification of Identified ICC ALERT Flood Warning Monitoring System Gaps 2. maintenance and Upgrading of existing sites.[TT]	COO WP&R	Additional sites indentified and procurement and installation to commence late Novemeber2011	12.10.11	Completed

4.11	Councils, with the assistance of the Bureau of Meteorology, should consider the susceptibility of their regions to flash flooding, and whether it is feasible and necessary to acquire and operate an automated local evaluation in real time system (ALERT system) for particular waterways.	Additional ALERT gauges sites have been identified and will be installed prior to the wet season. Prior to the January 2011 event, Ipswich commenced a review of the Alert Gauge network within the Ipswich Local government area. This review, in conjunction with BOM and SEQwater, identified the following activities; 1. Rectification of Identified ICC ALERT Flood Warning Monitoring System Gaps 2. maintenance and Upgrading of existing sites.[TT]	COO WP&R	Reviews conducted through BOM and Resilience Funding pathways. Procurement phase carried out and projects now in the co-ordination and delivery phase. Majority of new gauges in the 'six hours or less' category which addresses primarily flash flooding.	7.09.11	
4.13	Councils should ensure that residents and businesses can clearly understand the impact of predicted flood levels on their property. This may include one or more of the following methods: • information on rates notices about flooding at individual properties • geospatial mapping, available to the public, that depicts inundation at certain river heights • flood markers • flood flag maps and floodwise property reports • colour coded maps • information that relates gauge heights with the level of flooding to be expected at a property.	2011) Flooding information, ground levels and eave height levels	CFO/City Planner	Stage 1 on target for completion by 1 October. City Solicitor reported to CMF Board on 13 Sep - board approved the deliverable in principle. User Acceptance Testing to be finalised by 30 Sep - final data load (10000 pdf reports) takes 7-8 days. UAT complete. CMF approved system to go live. Soft launch 13 October, media launch 18 Oct (includes fliers in rates notices). Comms to be released internally within Council on 11 Oct	21.09.11	
4.14	In the course of flood events, warnings referring to gauge heights should include information about the location of the gauge.	As part of the review of the Communications and Warning sub-plan of the LDMP, identification of alternate warning systems and investigation into capabilities against event scenarios will be undertaken.[TT] This review needs to be lead by the LDC and nominated LDCC Communication Officer(s).[TT] The determined types of warnings need to be included in the "Community Awareness Framework" and associated education programs. [TT]	COO C&CS	Advice from hydrology area of ICC to progress. to determine where gauges are via BOM. Request to to provide update by 5 Oct 11. still determining location and relevance of gauge. The river gauge is located on the north bank of the Bremer River, just downstream of the David Trumpy Bridge. This information will be included on the Council website and in generic flood messages provided to the community. Information provided will be relevant to the community and will include level above or below 2011 flood event.	09.09.11 21.09.11 28.09.11 06.10.11 12.10.11	
4.15	Each local disaster management group should include in its meetings a representative of the operator of any dam upstream of its region which contributes water to flooding.	Invitation to be extended to SEQ Water by LDC.	COO WP&R	Invitation to be sent for the next LDMG	12.10.11	
4.24	The operator of any referable dam and the local disaster management group should develop a common understanding as to their respective roles in a flood	COO WPR is both referable dam operator and LDC Rosewood and Marburg Detention Basin Wivenhoe	COO WP&R	Completed		Completed 02.09.11
4.3	,	Flood information group to develop procedure for flash flood warnings including if needed a communication protocol. +C39	coo c&cs	Council accepts to agrees to perform its functions. Media systems established and ready to activate.	09.09.11 06.10.11 17.10.11	Completed 17.10.11
4.31	possess about flash flooding (or the immediate prospect of it) likely to endanger	agencies will be undertaken.	COO WP&R	Communications sub plan under preparation	12.10.11	

4.33	The Bureau of Meteorology should do its best to develop working relationships with all councils, particularly for the purpose of exchanging information in severe weather and flood events.	ICC participated in an initial consultative workshop with BOM, SEQwater, EMQ, QPS and other local governments to discuss a "whole of catchment" approach to the Lockyer, Brisbane and Bremer Catchments. This approach includes; - Knowledge & Information Management sharing (ie: Models, studies etc) - Management of Alert gauge network - Communication protocols.[TT]		Existing liaison interface in place and will be reviewed for enhancements	12.10.11	
Chapter 5 Eme	When a local government cannot effectively manage its response to a disaster, disaster management personnel from local governments in a position to assist should be deployed to help the local disaster management group.		COO WP&R	Advise pont of contact to other councils if assistance is required.	12.10.11	
5.2	Local governments should consider adopting uniform disaster management software, to enable inter-council assistance to be given more easily and effectively.	WPR to work with EBSB to develop Project brief for implementation of software. Review of Coordination Centre Information and tasking solution commenced, with presentation of the Guardian solution received. Business requirements identification and investigation of internal options underway via BIO process. This BIO includes investigation as to how the All Hazards Information Management System (AHIMS) will provide a state wide integrated communication and information solution for disaster management and integrate with LDCC solutions. [TT]		All SEQ local Govt councils have been working with DCS since 8th July to ensure that the All Hazards information Management software (AHIMS) referred to at item 5.9 below is designed and built to provide a single point of truth for QLD that all councils, LDMG, DDMG etc can access and use for data collection, decision making and reporting. It should also allow for cross-communication between councils. It should not just be a one-way communication tool, fed from a myriad of individual council systems/data repositories via interfaces. BIO 328 has been approved by POG and work is being scheduled. Next meeting with external parties 13 October. 13 Oct meeting to be hosted at ICC. Attendees will be all SEQ Council ClOs and DM co-ordinators plus reps from DCS.	21.09.11	
5.3	To ensure effective co-ordination in larger-scale disasters, deployment of personnel (and other resources) between local governments should be facilitated through the Council to Council (C2C) program.	Method of seeking assistance may require a LGAQ or CoM consideration. This is covered in the "Council to Council (C2C)" support guidelines which were in place and worked well during the January 2011 event. As with other RFAs, these requests need to be approved thru the LDC/LDMG. [TT]				
5.6	management arrangements, and take steps to establish them. Such arrangements may include forming disaster management sub-groups in those communities.			Sub plans for Disaster Management Plan i.e. Rosewood, Karalee are in draft form and aim to be completed by December 2011	12.10.11	- Property and the second seco

5.7	Whatever form arrangements take, they should seek to ensure that, in the event that flooding causes isolation: • there are lines of communication between the local disaster management group and the community • the community has the basic resources it needs to cope with its situation • the local disaster management group is aware of what supplies the community may need in prolonged disaster, and can respond to requests for assistance in a timely way • potential evacuation routes and centres are known Where a local government forms a sub-group of its disaster management group: • the responsibilities of the sub-group must be clearly defined within the local disaster management arrangements		COO WP&R	Sub plans for Disaster Management Plan i.e. Rosewood, Karalee are in draft form and aim to be completed by December 2011 This will not be pursed as all responsibilities will sit with the Ipswich LDMG	12.10.11	Completed
	each member of the sub-group must clearly understand his or her role. The Commission recommends that sub-groups and local disaster management groups set out their respective roles and responsibilities in writing.					The state of the s
5.9	Until the Ali Hazards Information Management System is in place and allows the status of requests for assistance to be tracked, other means should be used to keep local disaster management groups informed of the progress of requests for assistance.		COO WP&R	LDC/EMO to advise. Update from EBSB: Engaging with WPR to determine if EBSB can assist	10.10.11	
5.1	A clear protocol should be developed for managing the participation of local and district disaster management groups in the state level teleconferences, to govern and make more efficient participation in the teleconferences.	EMQ Role ICC participated in an initial consultative workshop with BOM, SEQwater, EMQ, QPS and other local governments to discuss a "whole of catchment" approach to the Lockyer, Brisbane and Bremer Catchments. This approach includes; - Knowledge & Information Management sharing (ie: Models, studies etc) - Management of Alert gauge network - Communication protocols. [TT]	COO WP&R	EMQ role so no direct ICC follow up required	12.10.11	
5.32	Management Queensland should work together to identify and address deficiencies in the ability of the SES to respond effectively to flooding. At the very least, suitable flood boats and flood boat training should be provided to SES	Council is currently drafting an MOU with the Dept of Community	COO WP&R	Initial draft prepared and second draft completed. The Local SES has 2 flood boats, 2 more to be delivered in November and 1 for delivery in February. Further Council has 2 additional boats. As such there will be 5 flood boats with 2 reserve boats by early 2012 with current numbers at 2 and 2 and will be 4 and 2 by November. Further there are currently 13 trained SES operators with an additional 2 operators to be trained this week end.	02.09.11 12.10.11	
5.4	Each council should develop an evacuation sub-plan in accordance with the Emergency Management Queensland guidelines. This includes involving local groups and people in the planning process.	Forms part of the review of the LDMP and particularly the following sub-plans; - "Flood / Severe Weather" Sub-plan - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	COO WP&R	Part of overall disaster management plan to be ready for submission for approval by end November 2011	12.10.11	
5.41	· · · · · · · · · · · · · · · · · · ·	Forms part of the review of the LDMP and particularly the following sub-plans; - "Flood / Severe Weather" Sub-plan - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	COO WP&R	Underway and due for completion by December 2011	12.10.11	

5.42	Where flooding is governed by a particular watercourse, the evacuation sub- plan should identify triggers in the form of those water level heights at which it is known that preparation for evacuation will be necessary.	Forms part of the review of the LDMP and particularly the following sub-plans; - "Flood / Severe Weather" Sub-plan - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	COO WP&R	Under review as to local applicability and relevance to overall disaster response	12.10.11	
5.43	It is a matter for councils whether or not they choose to publicise the location of evacuation centres before a disaster but there is a good deal to be said for doing so, particularly in smaller communities where the options are limited. Whether or not councils publicise the location of evacuation centres before a disaster, they should include in their disaster education programs information on evacuation procedures, and how to ascertain evacuation centre locations and safe evacuation routes.		COO WP&R	Considered more appropriate to advertise before an event as each event is dynamic and the need for actions and locations will be event specific.	12.10.11	
5.44	During floods, councils should as quickly as possible provide people in the relevant areas with advice as to the location of and routes to evacuation centres.	This will be picked up by communication staff of the LDCC Forms part of the review of the LDMP and particularly the following sub-plans; - "Flood / Severe Weather" Sub-plan - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	coo c&cs	Marketing Branch Media Manager to disseminate information through SMS messages, Council Website and Social Media. to progress Advice from Tony Trace - access routes Evacuation centre and routes identified relevant to specific event, and media systems have been established to disseminate required information including SMS, Social Media, Website and Local Broadcast Media.	09.09.11 06.10.11 17.10.11	Completed 17.10.11
5.45	That advice should be given using as many mechanisms as appropriate, including text message, radio and door knocking.	As per 5.44 As part of the review of the Communications and Warning sub-plan of the LDMP, identification of alternate warning systems and investigation into capabilities against event scenarios will be undertaken.[TT]	COO C&CS	Marketing and Media Branches can implement test messaging and radio. *Alan Roebuck to progress	09.09.11	Completed Refer to S.44
5.46	preparation and planning.	List has been identified and inspection will progress week beginning 5 September 2011 Review of the Evacuation centres currently identified under the LDMP has commenced, with the annual survey currently being distributed [5th September 2011. In conjunction with Red Cross and EMQ, this initial activity will be followed with a Evacuation Centre audit planned to commence prior to the end of September. Consideration needs to be given to including the Local Area support groups.[TT]	COO WP&R	Identification completed and audit to determine capacity and support required at each location underway and due for completion December 2012.	12.10.11	
5.47	Councils should audit identified evacuation centres to ensure the facilities and location are appropriate, preferably in consultation with the Australian Red Cross and the Department of Communities.	As per 5.46	COO WP&R	Identification and audit underway and due for completion December 2012.	12.10.11	
5.48		As per 5.46	COO WP&R	Identification and audit underway and due for completion December 2012.	12.10.11	
5.49	locations in which community groups established informal evacuation centres during the 2010/2011 floods, with a view to incorporating evacuation centres at	Should form part of local sub-plan Forms part of the review of the LDMP and particularly the following sub-plans; - "Flood / Severe Weather" Sub-plan - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	COO WP&R	To be part of local sub plans to be completed by December 2012	12.10.11	
	establishing and operating evacuation centres in the future.	Initial discussions have been undertaken with the communities of Rosewood and Marburg, with a draft Local Ara Plan being tabled. The LAP aims to outlines the; - required roles and associated responsibilities that need to covered from within the local community - key contacts - local resources Example of LAP - see attachment 3.[TT]	COO C&CS	to advise. 5.51	The identified groups and councils should, before the next wet season, establish cooperative arrangements as to how the centres should operate, and to ensure the centres have appropriate facilities.	To be identified as part of the sub-plan process Initial discussions have been undertaken with the communities of Rosewood and Marburg, with a draft Local Ara Plan being tabled. The LAP aims to outlines the; - required roles and associated responsibilities that need to covered from within the local community - key contacts - local resources Example of LAP - see attachment 3.[TT]	coo c&cs	and LDC/EMO to advise. Meeting held 5 Oct 11 with Disaster Manager (to discuss community management of evacuation centres. A forum is being coordinated for 22 November with key community groups/organisations identified as a key role in management of local evacuation centres.	28.09.11 17.10.11	
5.52	Councils should recognise that community groups may establish makeshift evacuation centres during a disaster. When this occurs, councils need to identify and establish communications with the centres as soon as possible.	LDCC function Forms part of the review of the LDMP and particularly the following sub-plans; - Evacuation Centre Management sub-plan. - Evacuation Sub-plan - Communication / Warnings Sub-plan.[TT]	COO WP&R	Agreed and will be part of communication sub plan to identify previous centres and primary contacts.	12.10.11	
5.53	Councils should develop plans for the effective and timely re-supply of makeshift centres.	Supply planning needs to be undertaken as part of local sub-plan Forms part of the review of the LDMP and particularly the following sub-plans; - Evacuation Centre Management sub-plan. - Evacuation Sub-plan - Communication / Warnings Sub-plan. This needs to take into account the recently released "Resupply guidelines".[TT]	COO WP&R	Agreed and will be part of sub plans to establish how the previous centres are accessed and demand determined. Acknowledges that each makeshift centre will arrive organically and have differing supply needs	e 12,10.11	
5.54	The Queensland Government should investigate the possibility of providing indemnity or obtaining insurance for makeshift evacuation centres established in good faith, and in the absence of official alternatives, to meet community needs.	Consider ICC implications of insurance claims arising from the use of makeshift evacuation centres.	Integrated Risk Management Co- ordinator	Whilst the recommendation is directed at the State Government, I have considered the implications for Council in the event of an insurance claim arising from an alleged negligent act by Council staff whilst we are assisting at a makeshift evacuation centre. I have confirmed that should damage occur that can be traced to a failure by Council (eg failure to enforce no-smoking in bed leading to a fire) at an evacuation centre that Council staff were in-charge of, our public liability insurance would cover us for the costs arising from our negligence. However, as in any claim, the circumstances will dictate which entity's insurance will meet the costs of any claim.		11-Oct-11
5.55	evacuation centres with the Australian Red Cross which clearly sets out the roles and responsibilities of the parties in planning and responding to evacuation requirements in a disaster.	MOU is currently being drafted Initial draft of the MOU has been developed for consideration by Council and the LDMG and preliminary discussions held around issues. see attachment 5. Note: LGAQ is looking at establishing a state-wide MOU.	COO WP&R	MOU currently under second review	12.10.11	
5.56	Cross should consider undertaking practice exercises with the Australian Red Cross to ensure both parties understand their respective roles and	Considered once MOU is completed and EMO recruited.
